7. Each Party shall permit a good temporarily admitted under this Article to be exported through a customs port other than that through which it was admitted.

8. Each Party shall provide that its customs administration or other competent authority refund the security to the importer or another person responsible for a good admitted under this Article and release the importer or the other person of any liability for failure to export the good on presentation of satisfactory proof to the customs administration or other competent authority of the importing Party that the good has been destroyed within the original period fixed for temporary admission or any lawful extension.

9. Except as otherwise provided in this Agreement, no Party may:

- (a) prevent a vehicle or container used in international traffic that enters its territory from the territory of the other Party to exit its territory on any route that is reasonably related to the economic and prompt departure of such vehicle or container;

- (c) condition the release of any obligation, including any security, that it imposes in respect of the entry of a vehicle or container into its territory on its exit through any particular port of departure; or
- (d) require that the vehicle or carrier bringing a container from the territory of the other Party into its territory be the same vehicle or carrier that takes such container to the territory of the other Party.

Article 205: Goods Re-entered After Repair or Alteration

1. Neither Party may apply a customs duty to a good, regardless of its origin, that re-enters its territory after that good has been temporarily exported from its territory to the territory of the other Party for repair or alteration, regardless of whether such repair or alteration could be performed in the territory of the Party from which the good was exported for repair or alteration.

2. Neither Party may apply a customs duty to a good, regardless of its origin, admitted temporarily from the territory of the other Party for repair or alteration.

3. For purposes of this Article, repair or alteration does not include an operation or process that:

- (a) destroys the essential characteristics of a good or creates a new or commercially different good; or
- (b) transforms an unfinished good into a finished good.

Article 206: Duty-Free Entry of Commercial Samples of Negligible Value and Printed Advertising Materials

Each Party shall grant duty-free entry to commercial samples of negligible value and to printed advertising materials imported from the territory of the other Party, regardless of their origin, but may require that:

- (a) such samples be imported solely for the solicitation of orders for goods, or services provided from the territory, of the other Party or a non-Party; or

Except as otherwise provided in this Agreement, no Party may adopt or maintain any prohibition or restriction on the importation of any good of the other Party or on the exportation or sale for export of any good destined for the territory of the other Party, except in accordance with Article XI of the GATT 1994, and to this end Article XI of the GATT 1994 is incorporated into and made a part of this Agreement, *mutatis mutandis*.¹

2. The Parties understand that the GATT 1994 rights and obligations incorporated by paragraph 1 prohibit, in any circumstances in which any other form of restriction is prohibited, a Party from adopting or maintaining:

3. Paragraphs 1 and 2 do not apply to the measures set out in Annex 202.

4. In the event that a Party adopts or maintains a prohibition or restriction on the importation from or exportation to a non-Party of a good, no provision of this Agreement shall be construed to prevent the Party from:

- (a) limiting or prohibiting the importation from the territory of the other Party of such good of that non-Party; or

¹ For greater certainty, this paragraph applies, *inter alia*, to prohibitions or restrictions on the importation of remanufactured goods.

- (b) requiring as a condition of export of such good of the Party to the territory of the other Party, that the good not be re-exported to the non-Party, directly or indirectly, without being consumed in the territory of the other Party.

5. In the event that a Party adopts or maintains a prohibition or restriction on the importation of a good from a non-Party, on the request of either Party, the Parties shall consult with a view to avoiding undue interference with or distortion of pricing, marketing or distribution arrangements in the other Party.

6. Neither Party may, as a condition for engaging in importation or for the import of a good, require a person of the other Party to establish or maintain a contractual relationship with a distributor in its territory.

CHAPTER THREE

RULES OF ORIGIN

Article 301: Originating Goods

Except as otherwise provided in this Chapter, a good shall originate in the territory of a Party where:

- (a) the good is wholly obtained or produced entirely in the territory of one or both of the Parties, as defined in Article 318;
- (b) the good fulfils the requirements set out for that good in Annex 301 as a result of production occurring entirely in the territory of one or both of the Parties;
- (c) the good is produced entirely in the territory of one or both of the Parties, exclusively from originating materials; or
- (d) except as provided in Annex 301 or except for a good of Chapter 1 through 24, heading 39.01 through 39.14 or Chapter 50 through 63 of the Harmonized System,
 - (i) the good is produced entirely in the territory of one or both of the Parties,
 - (ii) one or more of the non-originating materials used in the production of the good cannot satisfy the requirements set out in Annex 301 because both the good and the non-originating materials are classified in the same subheading, or heading that is not further subdivided into subheadings, and
 - (iii) the value of the non-originating materials classified as or with the good does not exceed 55 per cent of the transaction value of the good,

and the good satisfies all the other applicable requirements of this Chapter.

Article 302: Minimal Operations

Except for sets or assortments of goods referred to in Annex 301 or in Article 310, a good shall not be considered to be an originating good merely by reason of undergoing one or more of the following operations in the territory of a Party:

- (a) packaging, re-packaging or breaking up for retail sale of the good;
- (b) oiling or applying anti-rust paint or protective coatings to the good; or
- (c) disassembly of a new good into its parts.

Article 303: Value Test

1. Except as provided in paragraph 2, where the applicable rule of origin in Annex 301 for the tariff provision under which a good is classified specifies a value test, the value test shall be satisfied provided the value of non-originating materials used in the production of the good does not exceed the percentage of the transaction value of the good set out in the rule of origin applicable to that good.
2. For purposes of a good of heading 87.01 through 87.08, at the choice of an exporter or a producer of such good, the value test shall be satisfied provided the value of non-originating materials used in the production of the good does not exceed the percentage of either the transaction value or the net cost of the good set out in the rule of origin applicable to that good.
3. The value of non-originating materials used by the producer in the production of a good shall not, for purposes of satisfying the value test under either paragraph 1 or 2, include the value of non-originating materials used to produce originating materials that are subsequently used in the production of the good.

4. For purposes of paragraph 3, “the value of non-originating materials” in paragraphs 1 and 2 does not include:

- (a) the value of any non-originating materials used by another producer to produce an originating material that is subsequently acquired and used in the production of the good by the producer of the good; or
- (b) the value of non-originating materials used by the producer to produce an originating intermediate material.

5. For purposes of calculating the net cost of a good under paragraph 2, the producer of the good may:

- (a) calculate the total cost incurred with respect to all goods produced by that producer, subtract any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs, as well as non-allowable interest costs that are included in the total cost of all such goods, and then reasonably allocate the resulting net cost of those goods to the good;
- (b) calculate the total cost incurred with respect to all goods produced by that producer, reasonably allocate the total cost to the good, and then subtract any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and non-allowable interest costs that are included in the portion of the total cost allocated to the good; or
- (c) reasonably allocate each cost that forms part of the total cost incurred with respect to the good so that the aggregate of these costs does not include any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs, or non-allowable interest costs.

6. For purposes of calculating the net cost of a good under paragraph 2, the producer may average its calculation over its fiscal year using any one of the following categories, on the basis of either all motor vehicles in the category or only those motor vehicles in the category that are exported to the territory of the other Party:

- (a) the same model line of motor vehicles in the same class of vehicles produced in the same plant in the territory of a Party;
- (b) the same model line of motor vehicles produced in the same plant in the territory of a Party;
- (c) the same model line of motor vehicles produced in the territory of a Party;
- (d) the same class of motor vehicles produced in the same plant in the territory of a Party; or
- (e) any other category as the Parties may agree.

7. For purposes of calculating the net cost under paragraph 2 with respect to a good of headings 87.06 through 87.08 produced in the same plant, the producer may:

- (a) average its calculation,
 - (i) over the fiscal year of the motor vehicle producer to whom the good is sold,
 - (ii) over any quarter or month, or
 - (iii) over the automotive materials producer's fiscal year,

provided the good was produced during the fiscal year, quarter or month forming the basis for the calculation;

- (b) calculate the average referred to in subparagraph (a) separately for any or all goods sold to one or more motor vehicle producers; or
- (c) calculate the average in subparagraph (a) or (b) separately for those goods that are exported to the territory of the other Party.

Article 304: Value of Materials

1. For purposes of Article 303 and Article 307, the value of non-originating materials, including non-originating component goods referred to in Article 310, shall be:

- (a) the transaction value or the customs value of the materials at the time of their importation into a Party, adjusted, if necessary, to include freight, insurance, packing and all other costs incurred in transporting the materials to the place of importation; or
- (b) in the case of domestic transactions, the value of the materials determined in accordance with the principles of the *Customs Valuation Agreement* in the same manner as international transactions, with such modifications as may be required by the circumstances.

2. Notwithstanding paragraph 1, the value of an intermediate material shall be:

- (a) the total cost incurred with respect to all goods produced by the producer of the good that can be reasonably allocated to that intermediate material;
or
- (b) the sum of all costs that comprise the total cost incurred with respect to that intermediate material that can be reasonably allocated to that intermediate material.

Article 305: Intermediate Materials Used In Production

1. For greater certainty, if a non-originating material satisfies the requirements set out in Article 301 in the territory of one or both of the Parties, the resulting good shall be considered as originating and no account shall be taken of the non-originating material contained therein when that good is used in the subsequent production of another good.
2. For purposes of determining the origin of a good, a producer of a good may designate any intermediate material as a material to be taken into account as an originating or non-originating material, as the case may be, in determining whether the good satisfies the applicable requirements of the rules of origin.

Article 306: Accumulation

1. For purposes of determining whether a good is an originating good, a good originating in the territory of one or both of the Parties shall be considered as originating in the territory of either of the Parties.
2. For purposes of determining whether a good is an originating good, the production of the good in the territory of one or both of the Parties by one or more producers shall, at the choice of the exporter or producer of the good for which preferential tariff treatment is claimed, be considered to have been performed in the territory of either of the Parties by that exporter or producer, provided that:
 - (a) all non-originating materials used in the production of the good satisfy the requirements set out in Annex 301 entirely in the territory of one or both of the Parties; and
 - (b) the good satisfies all other applicable requirements of this Chapter.
3. Subject to paragraph 4, where each Party has a trade agreement that, as contemplated by the WTO Agreement, concerns the establishment of a free trade area with the same non-Party, the territory of that non-Party shall be deemed to form part of the territory of the free trade area established by this Agreement, for purposes of determining whether a good is an originating good under this Agreement.

4. A Party shall apply paragraph 3 only once provisions with effect equivalent to those of paragraph 3 are in force between each Party and the non-Party with which each Party has separately concluded a free trade agreement. Where such provisions in force between a Party and the non-Party apply to only certain goods or under certain conditions, the other Party may limit the application of paragraph 3 to those goods and under those conditions and as otherwise set out in this Agreement.

Article 307: *De Minimis*

1. Except as provided in paragraphs 2 through 4, a good shall be considered to be an originating good if the value of all non-originating materials used in the production of the good that do not undergo an applicable change in tariff classification set out in Annex 301 does not exceed 10 per cent of the transaction value of the good, provided that:

- (a) if the rule of origin of Annex 301 applicable to the good contains a percentage for the maximum value of non-originating materials, the value of such non-originating materials shall be included in calculating the value of non-originating materials; and
- (b) the good satisfies all other applicable requirements of this Chapter.

2. Paragraph 1 does not apply to a non-originating material used in the production of a good of Chapters 1 through 24 of the Harmonized System unless the non-originating material is provided for in a different subheading from the good for which origin is being determined under this Article.

3. A good of any of Chapters 50 through 60 of the Harmonized System that does not originate because certain non-originating yarns used in the production of the good do not fulfil the requirements set out in Annex 301, shall nonetheless be considered to originate if the total weight of all such yarns does not exceed 15 per cent of the total weight of that good.

4. A good of any of Chapters 61 through 63 of the Harmonized System, that does not originate because certain non-originating yarns used in the production of the component of the good that determines the tariff classification of that good do not fulfil the requirements set out for that good in Annex 301, shall nonetheless be considered to originate if the total weight of all such yarns in that component does not exceed 15 per cent of the total weight of that component.

ANNEX 301

SPECIFIC RULES OF ORIGIN

Part A - General Interpretative Notes

1. For purposes of interpreting the rules of origin set out in this Annex:
 - (a) the specific rule, or specific set of rules, that applies to a particular heading, subheading or group of headings or subheadings is set out immediately adjacent to that heading, subheading or group of headings or subheadings;
 - (b) a requirement of a change in tariff classification or any other requirement set out in a specific rule applies only to non-originating materials;
 - (c) the expression “a change from any other heading” or “a change from any other subheading” means a change from any other heading (or subheading) of the Harmonized System, including, where applicable, any other heading (or subheading) within the group of headings (or subheadings) to which the rule is applicable;
 - (d) where a specific rule of origin is defined using the criterion of a change in tariff classification, and it is written to exclude tariff provisions at the level of a chapter, heading or subheading of the Harmonized System, the materials classified in those excluded provisions must be originating for the resulting good to achieve originating status;
 - (e) the expression “a change from any heading outside that group” or “a change from any subheading outside that group” means a change from any other heading (or subheading) of the Harmonized System, except from any other heading (or subheading) within the group of headings (or subheadings) to which the rule is applicable;

- (f) where two or more alternative rules are applicable to a heading, subheading or group of headings or subheadings, if the good satisfies the requirements of one of those rules it does not need to satisfy the requirement of another of those rules;
- (g) the expression
- “a change from within that heading”,
 - “a change from within that subheading”,
 - “a change from within any one of these headings”,
 - “a change from within any one of these subheadings”, or
 - “a change to (a good) of (a tariff provision) from within that (tariff provision)”

means a change from any other good or material of that same heading (or subheading) of the Harmonized System;

- (h) where two or more alternative rules are applicable to a heading, subheading or group of headings or subheadings and the alternative rule contains a phrase commencing with the words "whether or not",
- (i) the change in tariff classification specified in the phrase commencing with the words “whether or not” reflects the change specified in the first rule applicable to the heading, subheading or group of headings or subheadings,
- (ii) the only change in tariff classification permitted by the alternative rule, in addition to the change in tariff classification specified at the beginning of that rule, is the change specified in the phrase commencing with the words "whether or not",
- (iii) unless otherwise specified, only the value of the non-originating materials referred to at the beginning of the alternative rule, and specified again in the phrase commencing with the words “provided that the value of the non-originating materials”, shall be included in calculating the value of non-originating materials, and

(iv) the value of any non-originating materials satisfying the change of tariff classification specified in the phrase commencing with the words “whether or not” shall not be included in calculating the value of non-originating materials,

(i) reference to weight in the rules for goods of Chapters 1 through 24 of the Harmonized System means dry weight unless otherwise specified in the Harmonized System.

2. A specific rule of origin set out in this Annex represents the minimum amount of production required to be carried out on non-originating materials for the resulting good to achieve originating status. A greater amount of production than that required by the rule for that good will also confer originating status.

3. Where a rule of this Annex applicable to a good contains both a required change in tariff classification and a percentage for the maximum value of non-originating materials, the *de minimis* provision of Article 307 permits the use of non-originating materials which do not satisfy the tariff change requirement, as long as the value of such materials does not exceed 10 per cent of the transaction value of the good. However, the value of such non-originating materials shall be included when calculating the value of non-originating materials and under no circumstances may the percentage for the maximum value of non-originating materials as set out in the rule be exceeded through the use of the *de minimis* provision.

4. Where:

(a) a rule of this Annex applicable to a good contains both a required change in tariff classification and a percentage for the maximum value of non-originating materials, and

(b) one or more of the non-originating materials used in the production of the good are classified in the same subheading, or heading that is not further subdivided into subheadings, as the good itself,

subparagraph (d) of Article 301, which provides that the good shall be considered as originating if the value of the non-originating materials classified as or with the good does not exceed the given percentage of the transaction value of the good, may be applied.

5. Given that, in the case described in paragraph 4, the good resulting from the application of subparagraph (d) of Article 301 qualifies as originating in its own right, no account shall be taken of the non-originating materials contained therein when that good is used in the production of another good. In this particular instance, only the value of any other non-originating materials that are used in the production of the final good and that satisfy the required change in tariff classification set out in the rule of this Annex would need to be taken into account when calculating the value of non-originating materials for purposes of determining the origin of the final good.

6. The product specific rules set out in this Annex also apply to used goods.

Note 1: *Notwithstanding any of the specific rules of origin, any good of Chapter 27 that is a product of a chemical reaction shall be considered to be an originating good if the chemical reaction occurred in the territory of one or both of the Parties. For purposes of this Chapter, a “chemical reaction” is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule.*

The following are not considered to be chemical reactions for the purposes of this definition:

- (a) dissolving in water or other solvents;*
- (b) the elimination of solvents including solvent water;
or*
- (c) the addition or elimination of water of crystallization.*

Note 2: *For the purposes of heading 27.10, “direct blending” is defined as a refinery process whereby various petroleum streams from processing units and petroleum components from holding or storage tanks combine to create a finished product, with pre-determined parameters, of heading 27.10, provided that the non-originating material constitutes no more than 25 per cent by volume of the good.*

Note 3: *For the purposes of heading 27.10, the following processes confer origin:*

- (a) Atmospheric distillation - A separation process in which petroleum oils are converted, in a distillation tower, into fractions according to boiling point and the vapour then condensed into different liquefied fractions. Liquefied petroleum gas, naphtha, gasoline, kerosene, diesel/heating oil, light gas oils, and lubricating oil are produced from petroleum distillation; and*
- (b) Vacuum distillation - Distillation at a pressure below atmospheric but not so low that it would be classed as molecular distillation. Vacuum distillation is useful for distilling high-boiling and heat-sensitive materials such as heavy distillates in petroleum oils to produce light to heavy vacuum gas oils and residuum. In some refineries gas oils may be further processed into lubricating oils.*

A good of this Chapter that is subject to purification shall be considered to be an originating good provided that the purification occurs in the territory of one or both of the Parties and results in the elimination of not less than 80 per cent of the impurities.

Note 5: **Separation Prohibition**

A good that meets the applicable change in tariff classification in the territory of one or both of the Parties as a result of the separation of one or both materials from a man-made mixture shall not be considered to be an originating good unless the isolated material underwent a chemical reaction in the territory of one or both of the Parties.
